### SIMPLE STRUCTURE, SAFE, LOW-WEIGHT AND EASY TO HANDLE

- The **structure** of these anti-theft locks is **completely made of steel** and each production phase is carefully carried out to guarantee the maximum quality and functionality. Moreover an **excellent quality locking cylinder** of the best brands in the market protects the keys from pushes.
- Each anti-theft lock is supplied with a set of two keys which can be **duplicated only with personal code**. On customer's request supplementary keys can be supplied.
- **Suitable to all 2" king pins**
- Easy and fast installation: fit the anti-theft lock on the king pin pressing the locking cylinder.
- To ensure a good working with the passing of time, it is necessary a periodic cleaning of the locking cylinder and of the key.
